Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. Claims 5-12 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claims. See MPEP § 608.01(n). Accordingly, the claims 5-12 have not been further treated on the merits.
2. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are replete with indefinite and operative language that renders the claims indefinite. Each element must be positively recited and structurally correlated with the combination so as to make for a complete and operative device. Claim 1 will be reviewed as an example yet all the claims should be reviewed for like problems and amended into proper claim format. In the preamble of claim 1, the limitation, "preferably comprising" is deemed to be indefinite. It is not clear the metes and bounds of such a limitation when it isn't clear whether the structure is required or not. Further in claim 1, "the hollow pin axis", line 9; "the supporting or retaining face", line 11; "the pin axis", line 14; "the end regions", line 21; "both sides", line 22; "each end region", line 24; and "the axis (B) of the receiving hole", line 26, all lack antecedent basis. Further in claim 1, "an inner chain link", line 16 and "a pair of outer link plates", line 29, are double inclusions of elements already recited in the combination and only confuse the reading of the claim.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Brown et al.

See Fig. 4 of Brown as to the method of operation.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brown et al.

Brown teaches the claimed invention excepting the placement of the pins first before the placement of the inner chain link. Brown teaches placement of inner links and then outer links being attached to the inner links simultaneous with the placement of the pins. To have placed the pins first then assembled the inner plates there over and then attach the outer plates thereto, would have been but an obvious choice of method step alternatives to one of ordinary skill in the art having the reference to Brown before him and rendering no new or unobvious result to the outcome of the process, such a provision being an obvious choice of arranging known method steps in the process of forming sprocket chain.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
